

You can't judge a bike by its cover

S&S® Super Stock™ Stealth Air Cleaner

This built-in "Stinger," featured in all Super Stock™ air cleaner kits except the tuned induction systems, directs air smoothly into the bore of the carburetor or EFI throttle body for reduced turbulence and increased flow. This is a feature the S&S teardrop air cleaners have had since the early 1970s when S&S introduced the first teardrop shaped air cleaner kit.

FLY under the RADAR

With the S&S® Super Stock™ Stealth Air Cleaner!

*will not prevent speeding tickets

Everybody likes to go fast, but not everybody likes to advertise. The S&S Stealth air cleaner kits are for the rider who likes to go fast, but wants to be just a little bit sneaky. Get all the performance of the S&S design, including the air directional "stinger" cone in the filter, and hide it under your stock Harley-Davidson® air cleaner cover.

Owners of 1999–2012 Harley-Davidson® big twins can install the new S&S Stealth air cleaner kit and pick up more power, using their stock air cleaner cover. Nobody will know because it looks entirely stock. We're talking *sleeper hog!*

Owners of 1993–1999 big twins with Evolution® engines and owners of Sportster® models can get the same performance kick—but won't be able to use their stock covers.

Cut-a-way shows the Stealth hiding under a stock air cleaner

OR... If You Got It,

With S&S® Super Stock™ Air Cleaner Covers

Of course, there are always those who figure if you got it, you ought to flaunt it. For those riders, we offer a line of stylish air cleaner covers to go with the new Stealth air cleaners. For the traditionalist, there is the Airstream cover—*an updated version of the classic S&S teardrop*. For those looking for more custom flair, we offer the Bobber and Muscle covers. These are small diameter round covers that leave the filter element exposed for a high performance *don't mess with me look* and a performance boost as well. The new Airstream, Bobber, and Muscle covers for the Stealth air cleaners are available in show quality chrome or Black Jack (wrinkle black) finish. If you decide you want to change your look, changing to another cover can be done in a matter of minutes. **Style, flexibility, and options!**

Note—S&S Stealth air cleaner kits may fit other covers using a 5/16" central mounting bolt.

Air cleaner kits are available without covers (Stealth) or with one of the S&S chrome covers. Other S&S covers are also available in case you decide to change your look. If you want a black cover, order the stealth kit and a black cover separately.

Airstream

170-0118

S&S AIRSTREAM AIR CLEANER COVER

- Fits the new S&S Stealth air cleaner kits
- An updated version of the speed inspired S&S teardrop shape
- Screened vent for more air without sucking in rain/road debris
- Steel construction with your choice of chrome or Black Jack (wrinkle black powdercoat)

PART NUMBERS

1" Taller Kit (includes 2 spacers).....	170-0127 ... MSRP \$49.95
(Filter only).....	170-0154 ... MSRP \$25.95

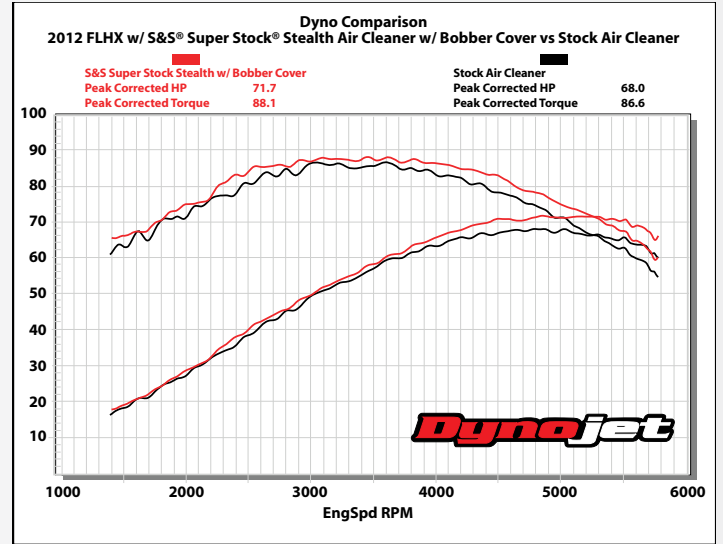

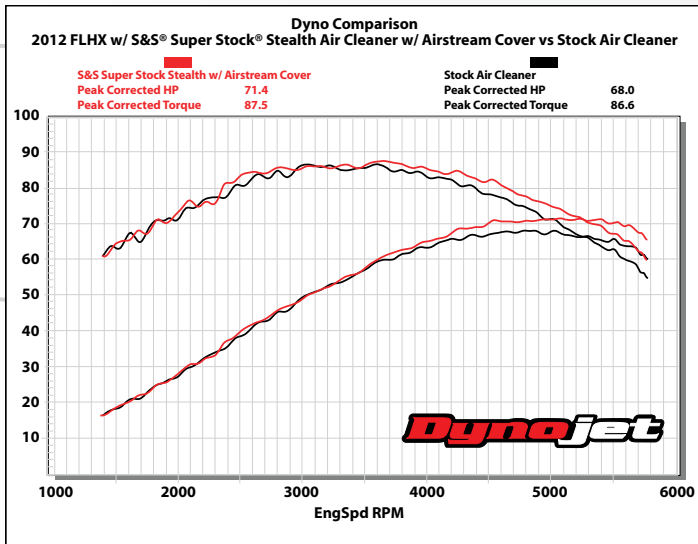

Note—1" taller air filter will not fit Muscle AC Cover Kits

Flaunt It!

Airstream • Bobber Dished • Bobber Domed • Muscle

These dyno charts compare the performance of a totally stock 2012 FLHX to the same bike with an S&S Stealth air cleaner, fitted with the S&S Airstream and S&S Bobber air cleaner covers. In both cases, the S&S Stealth air cleaner out-performs the stock air cleaner. With more filter exposure, the S&S Bobber cover delivers the largest increase in torque of 1.5 ft/lb over stock! For even more power add S&S performance mufflers. Both were tuned with Dynojet® Power Vision® Tuner.
