

For tuning and diagnostics, please visit the S&S web-site and download the ProTune II software:

<http://www.sscycle.com/tech-info/software/>

Additional information about downloading and installing ProTune II can be found in the instruction sheet included with your VFI module.

Please watch the "Installing S&S ProTune II VFI Software" video found in the Instructional Videos section of our web-site under S&S Media for additional help with installation and connecting the ProTune II software to your VFI module:

<http://www.sscycle.com/media/instructional-videos/>

If you are unable to access the internet and need a copy of ProTune II mailed to you, please contact S&S Technical Services at 608-627-TECH (8324).

Unrestricted S&S VFI modules and ProTune II software must not be installed or used for tuning of pollution controlled vehicles.

These vehicles have specific calibrations to meet emission regulations. Modifying or installing an unapproved calibration or module is considered tampering and is punishable by law.
