Gasoline is extremely flammable and explosive under certain conditions. Consult an appropriate service manual for your motorcycle for correct installation and operation. Be sure all federal, state and local laws are obeyed with the installation. If motorcycle has been running, wait until engine and exhaust pipes have cooled down to avoid getting burned before performing any installation steps. Use good judgment when performing installation and operating motorcycle. Before performing any installation steps, disconnect battery to eliminate potential sparks and inadvertent engagement of starter while working on electrical components. Read instructions thoroughly and carefully so all procedures are completely understood before performing any installation steps. Contact S&S with any questions you may have if any steps are unclear or not completely understood before performing any installation steps. A part that is suspect of being defective must not be replaced by a Dealer without prior authorization from S&S. If it is deemed necessary for S&S to make an evaluation to determine whether the part was defective, a return authorization number must be obtained from S&S. The parts must be packaged properly so as to not cause further damage and be returned prepaid to S&S with a copy of the original invoice of purchase and a detailed letter outlining the nature of the problem, how the part was used and the circumstances at the time of failure. If after an evaluation has been made by S&S and the part was found to be defective, repair, replacement or refund will be granted.

SAFE INSTALLATION AND OPERATION RULES:
Before installing your new S&S part, it is your responsibility to read and follow the installation and maintenance procedures in these instructions and follow the basic rules below for your personal safety.

- Gasoline is extremely flammable and explosive under certain conditions and toxic when breathed. Do not smoke. Perform installation in a well ventilated area away from open flames or sparks.
- If motorcycle has been running, wait until engine and exhaust pipes have cooled down to avoid getting burned before performing any installation steps.
- Before performing any installation steps, disconnect battery to eliminate potential sparks and inadvertent engagement of starter while working on electrical components.
- Read instructions thoroughly and carefully so all procedures are completely understood before performing any installation steps. Contact S&S with any questions you may have if any steps are unclear or any abnormalities occur during installation or operation of motorcycle with an S&S part on it.
- Consult an appropriate service manual for your motorcycle for correct disassembly and reassembly procedures for any parts that need to be removed to facilitate installation.
- Use good judgment when performing installation and operating motorcycle. Good judgment begins with a clear head. Don't let alcohol, drugs or fatigue impair your judgment. Start installation when you are fresh.
- Be sure all federal, state and local laws are obeyed with the installation.
- For optimum performance and safety and to minimize potential damage to carb or other components, use all mounting hardware that is provided and follow all installation instructions.
- Motorcycle exhaust fumes are toxic and poisonous and must not be breathed. Run motorcycle in a well ventilated area where fumes can dissipate.

WARRANTY:
All S&S parts are guaranteed to the original purchaser to be free of manufacturing defects in materials and workmanship for a period of twelve (12) months from the date of purchase. Merchandise that fails to conform to these conditions will be repaired or replaced at S&S's option if the parts are returned to us by the purchaser within the 12 month warranty period or within 10 days thereafter. In the event warranty service is required, the original purchaser must call or write S&S immediately with the problem. Some problems can be rectified by a telephone call and need no further course of action.

ADDITIONAL WARRANTY PROVISIONS:
(1) S&S shall have no obligation in the event an S&S part is modified by any other person or organization.
(2) S&S shall have no obligation if an S&S part becomes defective in whole or in part as a result of improper installation, improper maintenance, improper use, abnormal operation, or any other misuse or mistreatment of the S&S part.
(3) S&S shall not be liable for any consequential or incidental damages resulting from the failure of an S&S part, the breach of any warranties, the failure to deliver, delay in delivery, delivery in non-conforming condition, or for any other breach of contract or duty between S&S and a customer.
NOTE: The following installation procedure assumes that a stock exhaust system is being removed. If the bike you are working on has something other than the factory exhaust system, you may need to source some of the fasteners listed below.

1. Unplug stock oxygen sensors. Front O2 sensor connector is located near regulator. Rear O2 sensor connector is located under the seat.
2. Remove header clamp hardware that attaches front header to cam cover. Remove hardware that attaches rear muffler to transmission mount.
3. Remove stock header mount bolts. If necessary, loosen heat shield hose clamps to ease removal.
4. Remove exhaust system and set aside, taking care not to scratch cylinder heads. Remove stock flanges and retaining rings, save for reuse.
5. Remove stock mount from transmission.
6. Install provided exhaust bracket, removing stock hardware as necessary. Reinstall transmission mount bolts with blue loctite, torque to 15-18 lb./ft.
7. New conical exhaust gaskets are supplied in kit. Replace as necessary to prevent exhaust leaks.
8. Install flanges and retaining rings onto S&S header. Oxygen sensors and supplied adapters should be installed at this time. Use anti-seize on all threads.
9. Install front header heat shield, then rear header heat shield. Connect and loosely tighten all worm gear clamps. Position screw heads according to parts diagram arrows.
10. Apply anti-seize to exhaust studs, and loosely install the new header using supplied 5/16-24 hex flange nuts. Seat the rear pipe first then the front. Exert a firm pull forward on the front pipe, while keeping the rear pipe seated. Be careful not to damage gaskets. Do not fully tighten the flange nuts yet.
12. Attach muffler brackets (Picture 1) and tighten loosely to transmission bracket.

Tools Needed:
- 3/16” Allen wrench
- 1/4” Allen wrench
- 1/4” drive 6” extension
- 3/16” Nut driver or flat screwdriver
- 1/4” drive 1/2” socket
- 1/2” box wrench

USE AND CARE:
- Wash your accessories with the same care you use when washing your motorcycle.
- Use mild soap and water. DO NOT use abrasive chemicals or cleaners, or high pressure washers.
- Cover ends of mufflers when washing motorcycle. Mufflers may internally corrode if saturated with water and allowed to sit.
Replacement Parts:

1. Pipe, Header, 2 Into 2, Weldment, 2006-'17 Dyna® .......................... 551-0496
2. Shield, Rear, Upper, 2 Into 2, Outside Process, Black, 2006-'17 Dyna® .......................... 551-0506
3. Shield, Front, 2 Into 2, Outside Process, Black, 2006-'17 Dyna® ........ 551-0500
4. Shield, Rear, Lower, 2 Into 2, Outside Process, Black, 2006-'17 Dyna® .......................... 551-0512
5. Muffler, Assembly, Grand National, 2 Into 2, Cone Body, Black .... 551-0474
6. Bracket, Mounting, 2 Into 2, Black, 2006-'17 Dyna® .......................... 551-0482
7. Bracket, Top, Mounting, Muffler, 2 Into 2, Powdercoated, Black, 2006-'17 Dyna® .......................... 551-0571
8. Bracket, Bottom, Mounting, Muffler, 2 Into 2, Powdercoated, Black, 2006-'17 Dyna® .......................... 551-0572
9. Clamp, Muffler, Band Style, 1.75” Diameter, 3/8-16 X 1.57” Bolt .......................... 551-0569
11. Adapter, Oxygen Sensor, 12mm To 18mm, Stainless Steel .......................... 550-0375
12. Plate, Nut, 5/16-18 X 2”, Zinc Clear .......................... 551-0469
13. Clamp, Hose, Worm Drive, SAE #20 .......................... 551-0527
15. Screw, bhc, 5/16-18 X 5/8”, Zinc Plated .......................... 500-0763
17. Screw, shcs, 5/16-18 X 2”, Zinc Plated .......................... 500-0781
18. Screw, bhc, 5/16-18 X 7/8”, Zinc Plated .......................... 500-0801
19. Spacer, Powdercoated, .625”X.332”X.55”, Black .......................... 551-0570
